<u>Fuel Capacity:</u>	300 Gal	<u>Gray / Black Water:</u>	100 Gal each

COMMENTS:

We purchased this coach in 2002. Knowledge of exactly how many previous owners is unsure. It has been meticulously cared for inside and out since we purchased the coach. Service, maintenance and purchase records are available for all eight years.

Please don't hesitate to contact us with anything of interest you might wish to ask. klenfinger@gmail.com OR (229) 881 – 1720. Asking price is \$105,000, OBO, Negotiable.

This coach is one of the rare Blue Bird units not built on an assembly line, but specially built by the most experienced staff at a stationary location several miles south of the factory called "Wanderlodge South". An intricate set of detail amenities unique to these rare coaches was incorporated, with great care, into its construction. (A detailed explanation will be provided upon request.)

This coach is "Road Ready" at this very moment. We would not hesitate to leave for a cross country trip immediately and feel very secure. The coach has only gotten broken in.

Our reason for selling this outstanding coach is because we don't have time to use it as we did previously due to increasingly overwhelming job demands. Therefore it's more feasible to sell now and buy another Blue Bird at retirement, which is several years away.

Thank you for your interest in this coach. Although you might not purchase this coach, you will be impressed with it and, hopefully, will recommend it to someone whom you know.
